

Olist Order Funnel & Customer Insights

Olist maintains a strong 97% order completion rate across 99,441 orders, with the largest drop occurring at the Created → Approved stage (1,239 orders lost).

Cancellations account for only 0.6% of total orders, suggesting the platform retains buyers well once they commit to a purchase

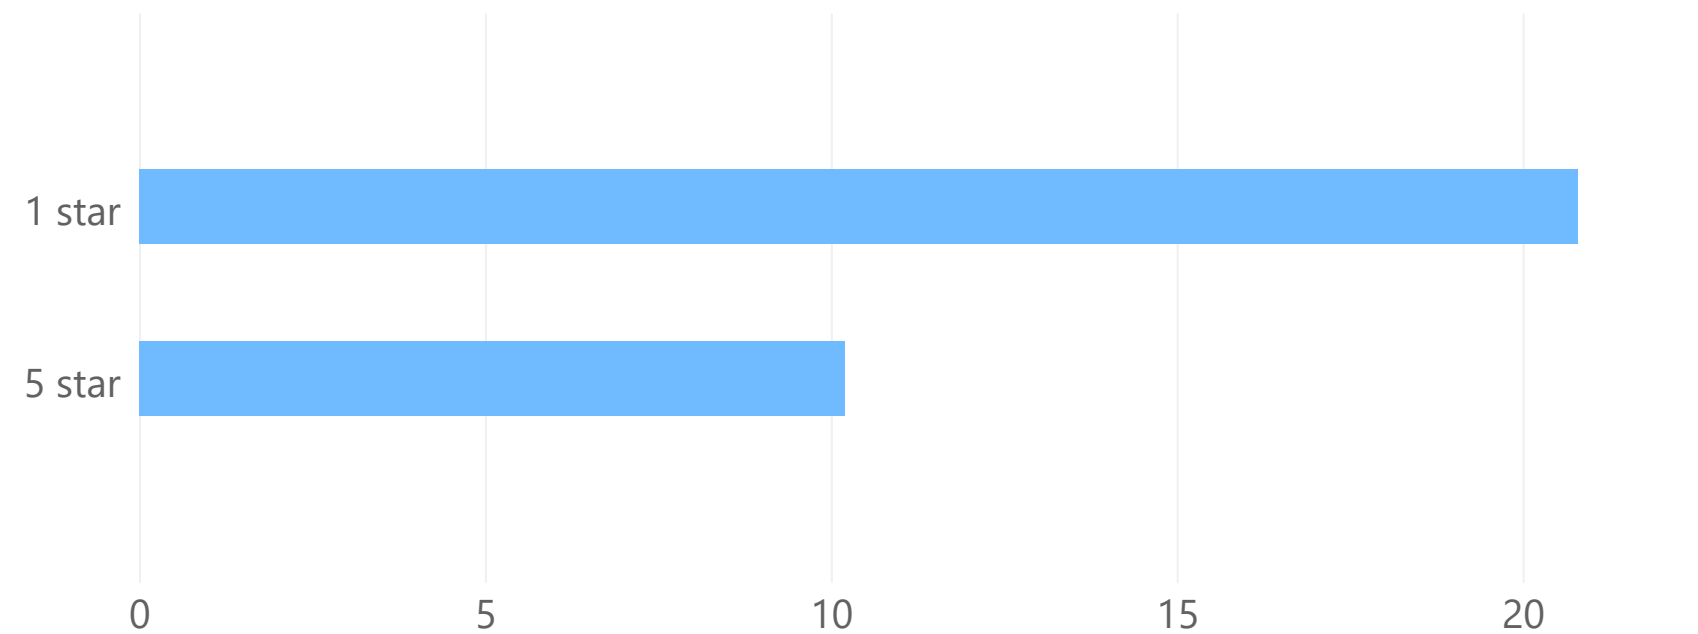

4.09

Avg Review Score

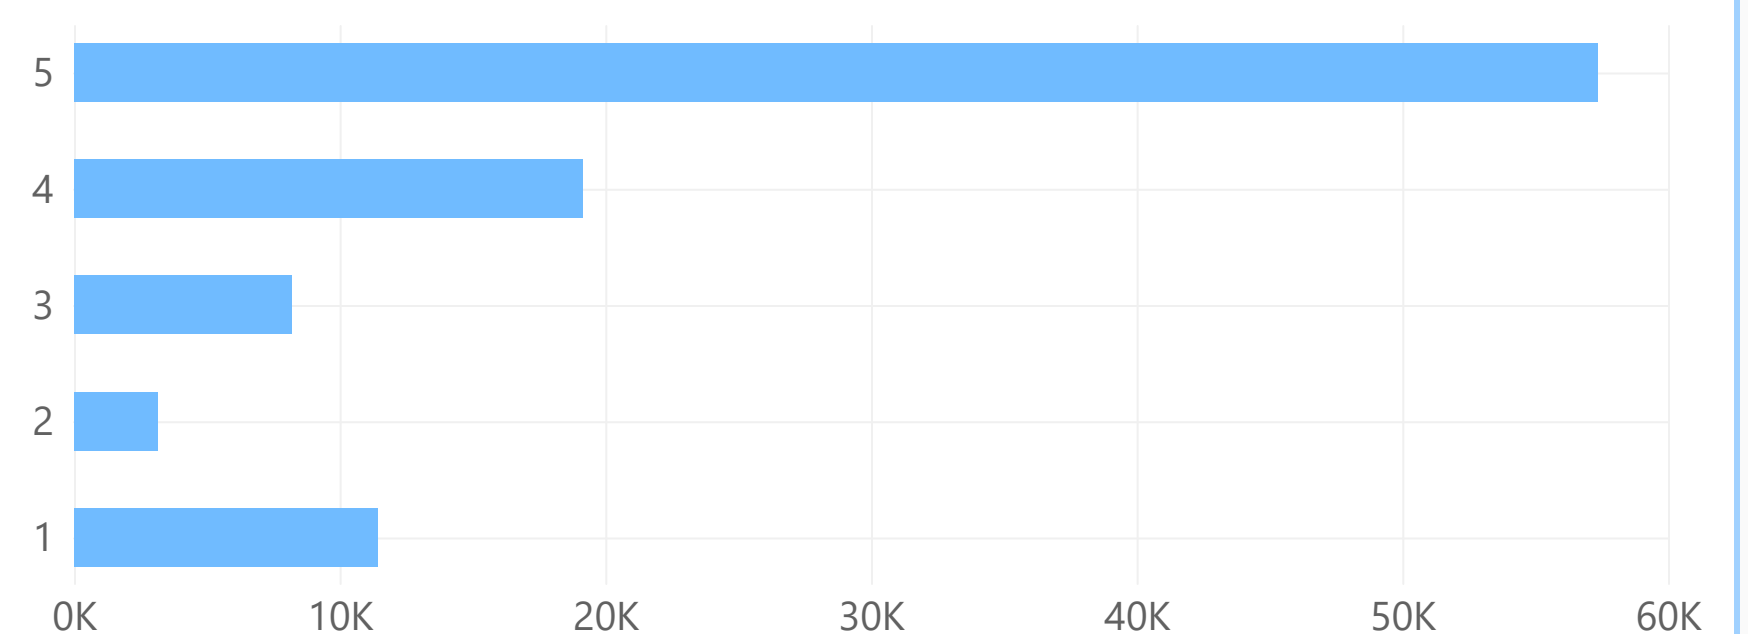

Customer satisfaction skews heavily positive with a 4.09/5 average score and 57.8% of customers giving 5 stars — but 11.5% gave 1 star, a segment worth investigating.

Delivery speed is the strongest predictor of satisfaction: 1-star customers waited an average of 20.8 days, nearly double the 10.2 days experienced by 5-star customers.

Review Score Distribution

160.99

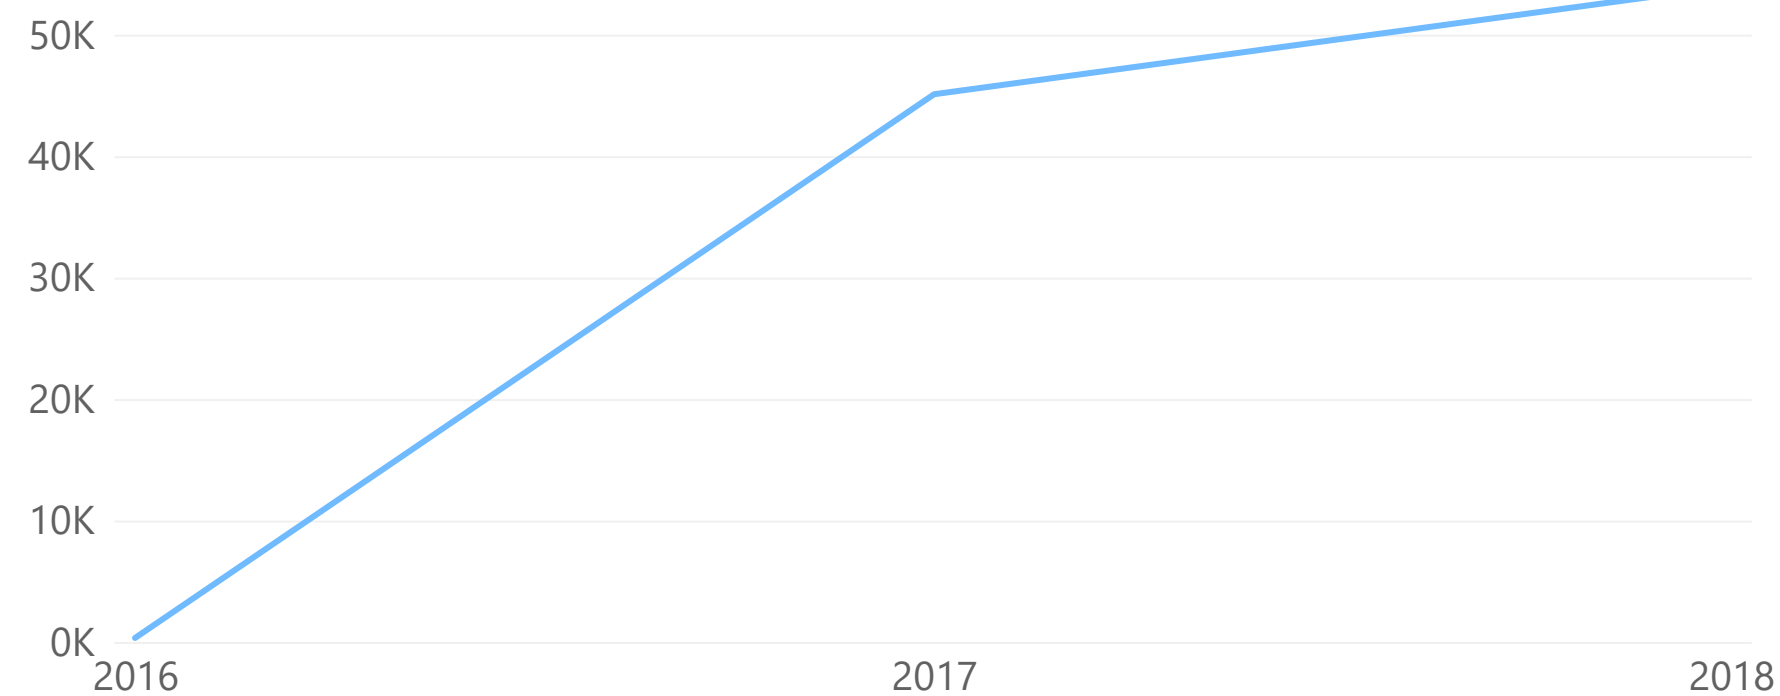

Avg Order Value

Bed, bath & table leads all categories with 11,115 orders, nearly 15% more than the second-ranked health & beauty category.

Order volume grew steadily from 2016 to a peak in November 2017, likely driven by Black Friday demand, before stabilizing at around 6,000–7,000 orders per month through 2018.

The average order value of R\$160.99 (median R\$105.29) suggests a wide range of order sizes, with high-value outliers pulling the mean upward.
